

HR WORLD Report

Topics Discussed

Introduction and discussion of the topics covered in the course so far.

Discussed the CIA Triad in depth, including the principles of confidentiality, integrity, and availability of data and systems.

As part of the discussion on the CIA Triad, explored encryption, TLS certificates, and the TCP and UDP protocols.

External Research

Installed GitHub Desktop and link it to the HR World repository, for the ease of use as mentioned in class.

Conducted research on the configuration options and administrative capabilities available through the router's default gateway (login page).
